

How to Kahoot. When to Kahoot. Where to Kahoot. Who(m) to
Kahoot. Why to Kahoot.

Kahoot, Reinventing Checking For Understanding

- Kahoot is an online game-based student response system.
 - The goal of the system is to engage students in a responsive way to promote and deepen their understanding of a certain subject or topic.

Usage of Kahoot

- Usage for Teachers
 - Kahoot can be used as an entry slip for students, a pop quiz, a check for understanding, or even a study guide for students in the classroom.
 - Its quiz set up has options that pertain to true/false, multiple choice, and even short answer questions.
 - Kahoot can be used as a whole class or independently on its own.

Usage of Kahoot

- Usage for Students
 - Just like teachers, students can use Kahoot as well.
 - Students can create their own quizzes which they can use to study.
 - These quizzes could potentially be used in small groups outside the classroom.
 - It can also be used for their own independent studies.

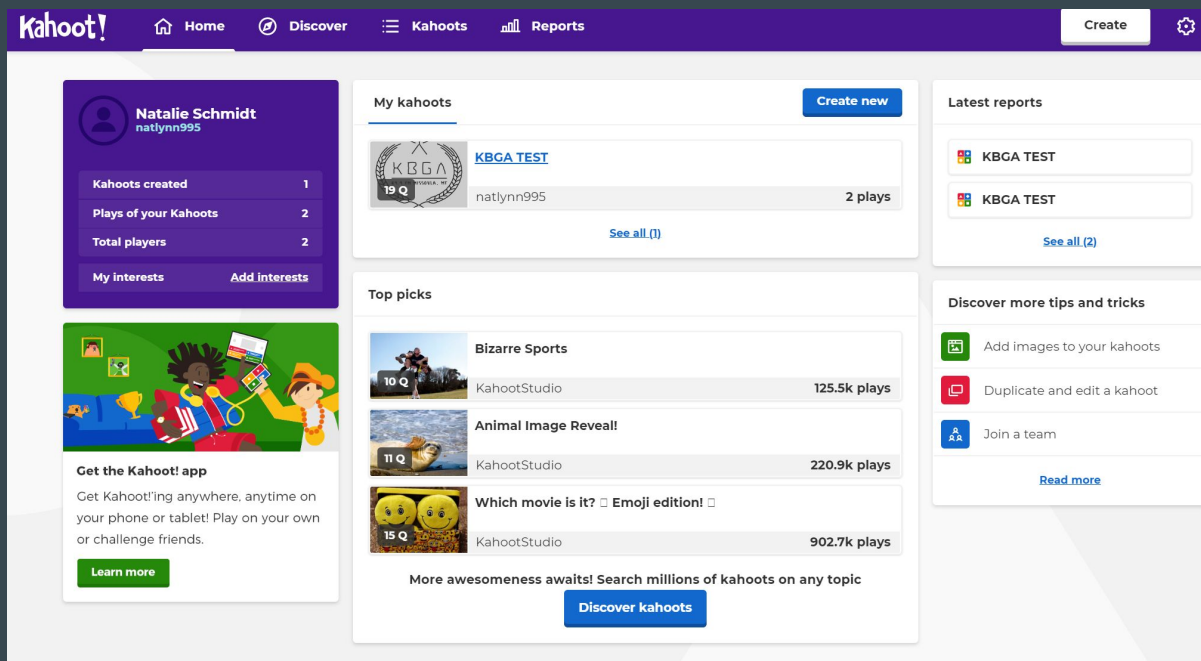

Making a Kahoot: How To

- Kahoot is free to use for both students and teachers.
 - There is an option to subscribe however for \$3-\$6 a month for more advanced features such as student performance data.
- Setting up an account.
 - Go to kahoot.com
 - Click create new account
 - Select teacher or student
 - Enter in your primary email, and make a password
 - You will get a confirmation email
 - Confirm your email to move ahead with setting up your first quiz.

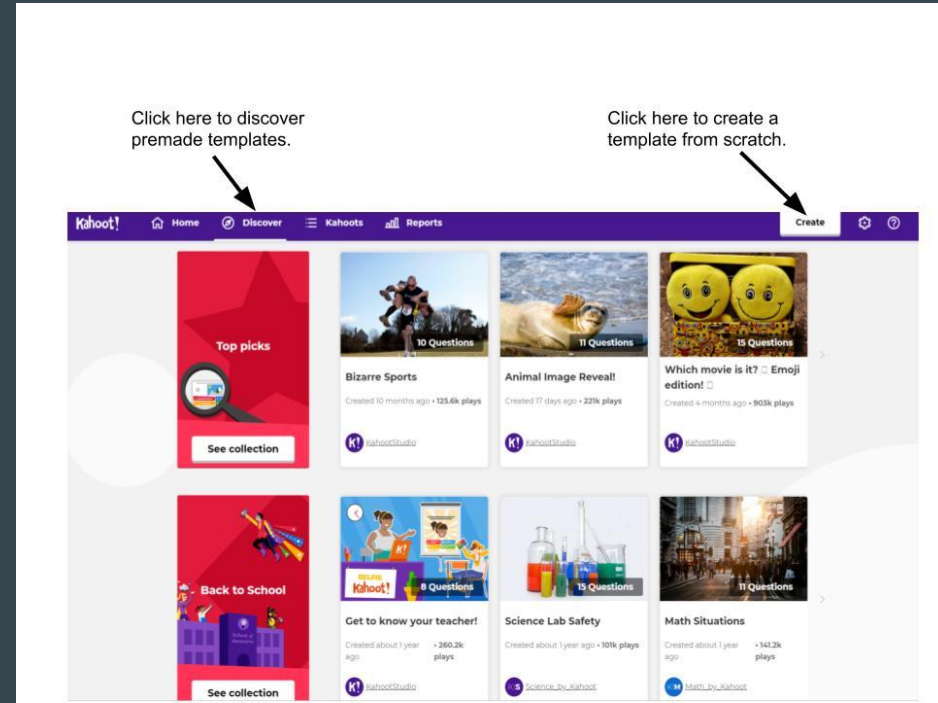

Making a Kahoot: How To

- Creating A Quiz
 - Once you log in, you will come to a screen that looks similar to this.

Making a Kahoot: How To

- Creating A Quiz
 - You can go up to the discovery button at the top, and be sent to a page with a whole bunch of fun quiz ideas and templates.
 - You can then either click a template you like, or click create to make a new one.

Making a Kahoot: How To

The screenshot shows the Kahoot! quiz creation interface. At the top is a purple header bar with the Kahoot! logo, a text input field for the quiz title, a 'Settings' button, and 'Exit' and 'Done' buttons. On the left is a sidebar with a 'Type your question' section containing a question type selector (multiple choice), a timer set to 20 seconds, and an 'Add question' button. The main area has a large text box with the prompt 'Click to start typing your question'. Below this is a dashed box for image uploads with the text 'Drag and drop image from your computer' and buttons for 'Image library', 'Upload image', and 'YouTube link'. At the bottom are four answer input fields, each with a colored icon and a label: 'Add answer 1' (red triangle), 'Add answer 2' (blue diamond), 'Add answer 3 (optional)' (yellow circle), and 'Add answer 4 (optional)' (green square). A link 'Import from spreadsheet' is at the bottom left.

 - This is the screen it will come to when you create a new quiz.

Example Kahoot Template

Now that you know how to make your own, let's look at a template you can use!

<https://create.kahoot.it/share/biology-structure-of-dna/89bec014-61b0-4f10-bc19-95f4af0ad108>

- Linked above is a 15 question quiz about the structure of DNA that can be used both inside and outside of the classroom.
- Questions can still be edited to one's liking.
- Notice the amount, type, and length of time given for each question. These settings can all be changed to fit one's quiz.

Playing Kahoot

- Once you have created and finished the template to your quiz, now it's time to use it!
- Click the play button next to the completed template.
- You will be guided to a screen asking if the quiz will be played as 1 vs 1 or team mode.
 - For classroom usage, use team mode. (Team mode will be used in this example.)
 - For outside the classroom, use 1 vs 1 mode.

Playing Kahoot

- You will then be brought to this screen.
- Have your students go to kahoot.it and enter in the pin on the screen.
- They will then be asked to create a username. Make clear their username should be appropriate.
- Once all of your students have entered into the game, it's time to play!
- Here's a link too to videos about all the different ways you can play Kahoot! <https://kahoot.com/how-to-play-kahoot/>

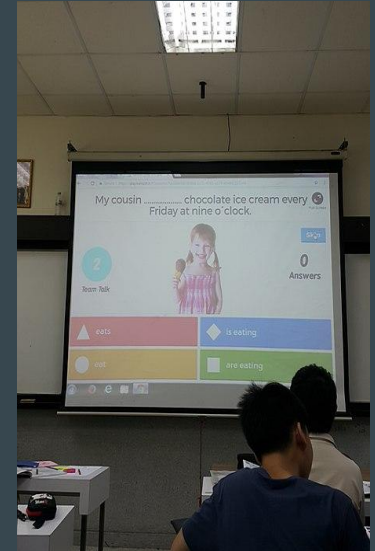

Here is a video as well that goes over how to setup your own Kahoot! and how to use it briefly.

Benefits Of Kahoot

- Keeps students engaged in the subject due to its competitive nature.
 - You are either competing against your classmates or against the clock.
- Allows for information to be repeated in a fun way.
- Is a good tool to check for understanding of a topic in the classroom.
 - Due to it being able to be done in and outside the class, this can be checked at any point.
- Be wary of the competition aspect.
 - Some students can get way too competitive, and take the game way too seriously.
 - Remind students that this is for fun and to learn, not to beat other people.
